

AI gave every team member 10x delivery capacity—but now project managers must achieve 10x productivity to keep up with these new capabilities.

■ The Problem

AI made individual contributors dramatically more productive. Management tools didn't evolve. Teams still run projects through disconnected tools, status meetings, and spreadsheets — and only 31% finish on time, on budget, and on scope.

"We need Cursor for project management."

■ The Solution

- ✓ Plans projects automatically
- ✓ Breaks work into executable tasks
- ✓ Assigns the right people or AI agents
- ✓ Predicts delays before they happen
- ✓ Tracks time and billing
- ✓ Generates and delivers automated reporting

■ Pricing

BASIC
\$15 /mo
 Up to 5 seats
 500 AI credits / mo

PRO
\$49 /mo
 Up to 25 seats
 5,000 AI credits / mo

ENTERPRISE
Custom
 SSO · custom integrations
 Dedicated manager

Flat per-workspace pricing — from \$3 / seat. At 20 seats, Pro is \$49 flat vs \$380–\$500 on incumbents. 30% off annual.

Raising \$500K pre-seed

Building the operating system for AI-native organizations. Currently the product is complete and in private beta.
